

Continue

Sie haben die Möglichkeit, ein Bild (Screenshot) oder ein Video vom Bildschirm Ihres Smartphones aufzunehmen. Die Aufnahme können Sie dann ansehen, bearbeiten und mit anderen teilen. Wichtig: Einige dieser Schritte funktionieren nur unter Android 11 oder höher. Wie Sie herausfinden, welche Android-Version Sie haben, erfahren Sie hier. Screenshot erstellen Öffnen Sie den Bildschirm, den Sie aufnehmen möchten. Je nach Smartphone: Drücken Sie gleichzeitig die Ein-/Aus-Taste und die Leisertaste. Wenn das nicht funktioniert, halten Sie die Ein-/Aus-Taste einige Sekunden lang gedrückt. Tippen Sie dann auf Screenshot. Sollte beides nicht funktionieren, sehen Sie auf der Supportwebsite Ihres Smartphoneherstellers nach. Links unten sehen Sie eine Vorschau Ihres Screenshots. Auf einigen Smartphones befindet sich das Screenshotsymbol am oberen Bildschirmrand. Scroll-Screenshot aufnehmen Wichtig: Diese Schritte funktionieren nur mit Android 12 und auf den meisten Bildschirmen, auf denen Sie scrollen können. Öffnen Sie den Bildschirm, den Sie aufnehmen möchten. Drücken Sie gleichzeitig die Ein-/Aus-Taste und die Leisertaste. Tippen Sie unten auf Mehr aufnehmen. Verwenden Sie die Hilfslinien zum Zuschneiden, um den gewünschten Inhalt auszuwählen. Ihren Screenshot finden, teilen und bearbeiten Tipp: Wenn Sie die Fotos App nicht haben, verwenden Sie wahrscheinlich eine ältere Android-Version. Öffnen Sie in diesem Fall die Galerie App und tippen Sie auf Albumansicht Ordner "Screenshots". Öffnen Sie auf Ihrem Smartphone die Fotos App . Tippen Sie auf Galerie Screenshots. Wenn Sie einen Screenshot teilen möchten, tippen Sie auf "Teilen" . Zum Bearbeiten eines Screenshots tippen Sie auf "Bearbeiten" . Smartphone-Bildschirm aufnehmen Wischen Sie zweimal vom oberen Bildschirmrand nach unten. Tippen Sie auf "Bildschirmaufnahme" . Eventuell müssen Sie nach rechts wischen, um die Einstellung zu sehen. Wenn sie nicht angezeigt wird, tippen Sie auf "Bearbeiten" und ziehen Sie "Bildschirmaufnahme" in die Schnelleinstellungen. Wählen Sie aus, was Sie aufnehmen möchten, und tippen Sie auf Starten. Die Aufzeichnung beginnt nach dem Countdown. Wenn Sie die Aufzeichnung beenden möchten, wischen Sie vom oberen Bildschirmrand nach unten und tippen Sie auf die Benachrichtigung "Bildschirmaufzeichnung" . Bildschirmaufzeichnungen suchen Öffnen Sie auf Ihrem Smartphone die Fotos App . Tippen Sie auf Galerie Filme. Weitere Informationen Wie können wir die Seite verbessern? Antworten von Community-Experten erhalten You can take a picture (screenshot) or record a video of your phone's screen. After you capture your screen, you can view, edit, and share the image or video. Take a screenshot Open the screen that you want to capture. Depending on your phone: Press the Power and Volume down buttons at the same time. If that doesn't work, press and hold the Power button for a few seconds. Then tap Screenshot. If neither of these work, go to your phone manufacturer's support site for help. At the bottom left, you'll find a preview of your screenshot. On some phones, at the top of the screen, you'll find Screenshot capture . Take a scrolling screenshot Important: These steps work only on Android 12, on most screens that allow you to scroll. Open the screen that you want to capture. Press the Power and Volume down buttons at the same time. At the bottom, tap Capture more. To select the content you want to capture, use the crop guidelines. Find, share & edit your screenshot Tip: If you don't have the Photos app, you're likely running an older Android version. Open your phone's Gallery app and tap Album view Screenshots folder. Open your phone's Photos app . Tap Library Screenshots. To share a screenshot, tap Share . To edit a screenshot, tap Edit. Record your phone screen Swipe down twice from the top of your screen. Tap Screen record . You might need to swipe right to find it. If it's not there, tap Edit and drag Screen record to your Quick Settings. Choose what you want to record and tap Start. The recording begins after the countdown. To stop recording, swipe down from the top of the screen and tap the Screen recorder notification . Find screen recordings Open your phone's Photos app . Tap Library Movies. Related resources Edit photos with the Photos app Find things in photos with the Photos app Get answers from community experts Knowing how to take a screenshot on Android seems simple enough, but it's more complex than you'd think. With so many phone makers using Android, each one has slightly different methods of capturing what's on screen.Fortunately, a lot of these methods overlap. Many of these are simple button combinations or on-screen prompts, but others offer physical gestures if you want to wave your hand around magician-style. We break down all the methods for the most popular Android phone brands below.If you're new to Android, or simply want to get the most out of your phone, we've also got a guide on how to remove Android bloatware that might be preinstalled. Or how to move Android apps to an SD Card if you need some extra space on your internal storage. And here's how to use Google Photos, if you're keen to get your images set up on Google's cloud storage system.How to take a screenshot on a Samsung phoneTaking a screenshot on a Samsung phone can be managed in quite a few ways, depending on the model. All of them are fairly straightforward though.The primary method is to hold down two buttons1. Hold the power button and volume down keys. Depending on which Samsung you have, these buttons could be both on the same side of the phone, or on opposite sides, but it works either way.If you're using an older phone with a home button, then you need to hold the power button and the home button instead.(Image credit: Tom's Guide)If your device has an S Pen stylus, then you have another way to screenshot.1. Remove the S Pen from its holder. This should cause a pop-up menu of S Pen-specific options to appear.2. Tap "Smart Select" in the pop-up S Pen menu, then drag a selection box over the portion of the display you want to capture.Optionally, you can use the "Palm Swipe" feature to take a screenshot by moving your hand across the screen. You'll need to enable this yourself however.1. Go into the Settings app, then find the "Advanced features" section.(Image credit: Tom's Guide)2. Now look for "Motions and gestures", and in here toggle "Palm swipe to capture" on. (Image credit: Tom's Guide)3. You should now be able to take screenshots with the gesture, although the name is a little misleading. You use it by swiping the edge of your hand from one side of the display to the other, rather than using the flat of your hand.(Image credit: Tom's Guide)How to take a screenshot on a Motorola phoneYou have two methods in Motorola's MyUX to take screenshots. The first is open the recent apps screen. 1. Go to the recent apps screen by swiping up from the bottom of the screen and pausing. That's if you're using gesture controls. If you have virtual buttons enabled, you do this by hitting the button on the right with the square icon if you're using virtual buttons.(Image credit: Tom's Guide)2. Once you're here, tap the Screenshot button at the bottom of the screen. If you want to capture more than what was just on the screen, you can scroll-capture by pressing the button with two arrows facing downwards that appears after taking the first screenshot.(Image credit: Tom's Guide)The other way is with a gesture. This is active by default.1. Tap and hold the screen with three fingers. The screenshot will pop up in a few moments.(Image credit: Tom's Guide)How to take a screenshot on a OnePlus phoneIn OxygenOS, OnePlus gives you two options for screenshots, although only one is enabled by default.The default one is a button combination1. Press the power and volume down buttons simultaneously.(Image credit: Tom's Guide)Alternatively, you can enable a gesture command. 1. Open the Settings menu, then look for "Buttons and Gestures". Open this section.(Image credit: Tom's Guide)2. Now look for "Quick Gestures", then in this menu enable the setting named "Three-finger screenshot". (Image credit: Tom's Guide)3. With this switched on, take screenshots by dragging three fingers from the top of the screen to the bottom.(Image credit: Tom's Guide)How to take a screenshot on a Google Pixel phoneIf you've got a Pixel phone, you also get the common button-based shortcut, as well as another platform-specific gesture.First off, the simple way with buttons.1.Hold the power button and the volume down button. (Image credit: Tom's Guide)Alternatively, here's a method you don't need the buttons for:1. Open the recent apps screen by swiping up from the bottom of the screen and pausing for a moment, or by pressing the square-shaped overview button if you have virtual buttons enabled. (Image credit: Tom's Guide)2. Here you'll see a screenshot icon, which you can now tap to take a shot of the current app. Alternatively, you can capture a portion of the screen by using the "Select" option on the right side.(Image credit: Tom's Guide)Next up, why not check out our other Android-themed guides, including how to update Android apps, how to identify plants on Android, how to identify dog breeds on Android and how to identify landmarks on Android. When it works, you will hear a capture sound and see a screenshot preview at the bottom left of the screen, where you can tap on it to edit or share.Some Android phone manufacturers offer a scrolling screenshot feature that can capture a whole webpage or message thread. They all have different names, but each involves taking a screenshot then tapping on a button when the preview appears. For example, on a Samsung phone, you should press the button with two arrows in a box to use Scroll Capture. Huawei has a similar option called Scrollshot, LG offers an Extended option, and OnePlus has Expanded Screenshot.If your phone lacks this feature, consider a third-party app like Screen Master.How to Take a Screenshot on a Windows PCPhotograph: Simon HillTo capture a screenshot on a Windows laptop or desktop computer, press the Print Screen keyboard key (usually abbreviated to Prt Scn or similar). If you only want to grab a screenshot of the active window, press the Alt and Print Screen keys together. Your captured screenshot is copied to the clipboard automatically and you must open Microsoft Paint, Photoshop, or whatever image software you use to paste it so you can edit and save it.If you just want to capture a portion of the screen in Windows 10 try pressing the Windows, Shift, and S keys together. You can then click and drag to highlight the bit you want and let go to capture it. In earlier versions of Windows you can do the same thing with the Snipping Tool, which is found by clicking Start and typing "snipping tool" in the search bar. Once again, the screenshot is copied to your clipboard for you to paste.To capture screenshots and automatically save them, press the Windows and Print Screen keys together. Screenshots are saved in a folder titled Screenshots in your Pictures folder.How to Take a Screenshot on a ChromebookTo capture a screenshot on a Chromebook, press the Control (usually abbreviated to Ctrl) and Show Windows (a rectangle with two lines to the right) keys together.To capture a portion of the screen, press the Shift, Control, and Show Windows keys, click and drag to highlight the bit you want, then let go to grab the screenshot.
